- This is a very small room of Corners with 5 at the time of this report. It is also an aging room.
- Jeremy provides youth over Jones who is 28 and Howard who is 27. Both are playing exceptional.
- Jeremy is comparable height with Perry, Igminoghene and Jones
- The Dolphins Corners have decent speed. Jeremy possesses comparable Speed to Jones and Igminoghene and is faster than Needham and Howard.
- Arm length is longer than Needham and on par with Igminoghene and Howard.
- Hand size is the same as Jones and 1 to almost 2 inches than all other Dolphins Corners.
- Jeremy's 36-inch Vertical is better than Needham and Howard's.
- Jeremy's Broad Jump places him in elite territory in the NFL, and beyond Igminoghene, Needham and Howard. Jones' Broad Jump is exceptional and unmatched through the league
- His Shuttle places him in elite territory with Jones and beyond all other Corners on this roster and beyond many Corners in the NFL.
- Combine numbers show equal athleticism and slightly more explosiveness compared to some of the Corners in this room.
- If adding corners to this room is a priority, Jeremy will provide immediate youth and competition for playing time.
- He will also stand to learn much from Xavien Howard with whom he shares a similar style of play.
